

Dr. Razdolsky has developed this unique, **NO COST** program especially for children who are not quite ready to begin orthodontic treatment. Because growth and development vary greatly with each patient Dr. Razdolsky prefers to examine and closely monitor your child's individual progress and eruption. This will determine the ideal time for your child to start orthodontic treatment and will insure optimum results.

All visits and any necessary x-rays are complimentary as well !

“Every time your child comes in for their observation appointment they will have a chance to spin our amazing reward wheel to receive **great prizes**..... Your child will also be able to participate in our annual contests to win **wonderful gifts**.

We hope to see you and look forward to providing you with the best orthodontic care.

.... And don't forget to Smile!
